Instructions & Rules

1. Tee

Every hole starts at the tee. The tees are marked by a post at the side or a board set into the ground.

2. Playing the hole

The first throw is made from the tee towards the basket. Every further throw is made from the spot where the disc last landed, with your foot placed on that spot.

3. Aim of the hole

A hole is finished as soon as the disc is in the basket. The score is the number of throws from the tee until the disc lands in the basket.

4. Order of play

When several people play, the person whose disc is furthest from the basket always throws next. On the next hole, the person who needed the fewest throws on the previous hole goes first.

5. Safety and consideration

Show the greatest possible consideration for people and animals in the park at all times! If someone is in the possible flight path, you must not throw. If in doubt, someone can stand in front of the person to shield them, but even then the utmost caution is required.
